

Summary:

On 31 October 2018 the Croatian Competition Agency (CCA) received a request from the Croatian Regulatory Authority for Network Industries (HAKOM) seeking its additional comments regarding the opinion of the CCA of 11 October 2018, Class: 034-08/18-01/075, Reg.no.: 580-15/26-18-002, regarding the conclusions under the document “Wholesale market for voice call termination on individual mobile networks” (hereinafter: Market Analysis) relating to the assessment of significant market power of dominant network operators.

Therefore, the CCA reviewed the proposed decision on the definition of the wholesale market for voice call termination on individual mobile networks subject to ex-ante regulation – the constituent part of which is the Market Analysis concerned (Class: UP/I-344-01/18-03/03, Reg.no.: 376-11-18-2 of 28 September 2018), that was submitted by HAKOM in its writing of 28 September 2018 (Class: UP/I-344-01/18-03/03, Reg.no.:376-11-18-2).

Based on the decision of the Competition Council the CCA adopted the supplement opinion stating that it has no objections to the conclusions under the proposed decision relating to the assessment of significant market power of dominant network operators.
